

Step inside a Compact Elegance Home Lift

A discreet and practical alternative to using the stairs

ALTITUDE
LIFTS

The Compact Elegance Home Lift range. Specially designed to fit easily into your home.

Designed to make your life easier, a Compact Home Lift allows you to travel safely and effortlessly between floors, its unique rail and drive system allows you to fit the lift almost anywhere in the home.

Taking up minimal space, and with the smallest footprint, the Elegance range gives you flexibility in where to fit your lift, whilst maximising your living space. The Elegance Plus range gives you the convenience of a larger lift car size if you need to travel in a wheelchair - either now or in the future.

Committed to accessible living, the unique Compact Home Lift range allows you to remain living independently in your home. For complete peace of mind a comprehensive 24 month parts warranty and 12 month labour warranty is provided with all new installations, with the option of extended service and maintenance plans if desired.

So, if you're looking for an innovative, attractive and useful long-term accessible living solution, the answer has to be a Compact Home Lift.

The Elegance

A Compact and Luxurious Home Lift

The Compact Elegance through-floor Home Lift is designed to make it easier for you to move around the house. Whether you're starting to find the stairs a bit much, or are planning ahead by future-proofing, you will find the Elegance will fit discreetly into any home.

The Elegance is elegantly curved and with its clear car body, it will perfectly compliment your style of décor. It's so versatile that it can be installed in the corner of a room, in a cupboard or in a stairwell void. Alternatively it can take pride of place in the centre of a room or entrance hallway.

We all need to do our bit for the environment, and a Compact Home Lift is no different. Each one of our models plugs into a standard mains socket and uses no more electricity than switching your toaster on!

Installation is simple – in most cases work is completed within a single day and once your Home Lift is fully working, our friendly installation engineers will guide you through the simple usage instructions.

The Elegance Plus

Elegance Plus Spacious Luxury HomeLift

The brand new Compact Elegance Plus is a larger Home Lift designed to comfortably carry a full-sized wheelchair, or three people. The Home Lift's clear body helps it blend seamlessly into your home and the unique shape means the rails are discreetly recessed behind the slightly wider entrance/exit.

The Compact Elegance Plus has been designed to offer more space and luxury for homeowners who need a larger lift for their home.

The combination of style and practicality has been perfectly balanced with the Compact Elegance Plus. Due to its size and weight loading, the Home Lift can comfortably accommodate a full-sized wheelchair as well as carrying an extra person. The gently-angled integral ramp and the wider entrance/exit space, helps make access very simple.

Just like the Elegance though, the Elegance Plus Home Lift will install quickly without any need for load-bearing walls, travel quietly and use minimal power when moving between floors.

Compact Lift Range

The entire range of Compact Home Lifts works on the principle that the lift car travels on self-supporting rails which require no load-bearing walls. In most instances, a simple ceiling aperture is all the building work that is needed and our versatile rails affix to the lower level floor, the aperture insert and the ceiling of the upper level, providing strength and stability.

All of our range comes as standard with: Floor insert, battery back-up system, half height gate, electric interlock strike and grab rail.

The Elegance

The Elegance is a 2 person, 170kg lift. It has a vast array of safety specifications, so you can have absolute confidence in your lift, when you use it every single time. It is dependable and reliable without having to compromise on looks. The clear-sized lift car body, helps it blend into any room it is installed into.

The Elegance Plus

The Elegance Plus, is the smallest vertical wheelchair lift on the market, with a 220kg lifting capacity.

It has a wide entry to the front of the car and also has a gently angled ramp for easier wheelchair access.

The Elegance plus, comes with the same safety features as the Elegance and looks every bit as good.

The Elegance Plus Thru-Car

The Elegance Plus Thru-Car does exactly what it says it does – you can enter or exit from both sides of the lift car. This model is ideal for installation in stairwell voids and for users who rely on a wheelchair.

Why Choose a Compact Home Lift?

Maximise your living space

Move your lift to the another floor and with only two slim rails remaining, you'll hardly know it is there.

Small footprints

Both the Elegance and the Elegance plus have extremely compact footprints, despite the fact that the elegance plus will accommodate a full-sized wheelchair.

Elegant interior lighting

Subtle and attractive internal lighting at the top and bottom of the lift car means you can travel in safety any time during the day or night.

Packed with safety features

Multiple sensors are fitted to every Compact Home Lift to ensure that everyone remains safe – both inside and outside the lift.

In-car control panel

The in-car control panel is designed to be extremely easy to use with push-button, hold-to-run controls.

Remote control

Your Home Lift comes with two remote control handsets included. Additional handsets can be purchased if required.

Compact Home Lifts Features & Benefits

Small Footprint

The Elegance footprint is a remarkably small 0.8m². The slightly larger Elegance Plus footprint will accommodate a full-sized wheelchair, and has a footprint of 1.44m².

Quiet

Powered by a self-contained, electric drive motor which is completely hidden away in the lift car roofspace. There are no noisy hydraulics with a Compact Home Lift.

Fast Installation

Standard installations can take as little as one day once the ceiling aperture has been created by a qualified builder.

Power Consumption

A Compact Home Lift plugs into a single, standard 10 amp domestic power socket - just like any other domestic appliance. When running, it uses no more power than if you were to switch your toaster on.

Unique Guide System

It's what makes a Compact Home Lift so wonderfully versatile; our self-supporting structure of two parallel, vertical rails bear the entire load of the lift. No additional burden is placed on the structure of your home.

Self Contained Drive System

Our unique, self-contained drive system is cleverly concealed in a single space within the roof area of the lift car. No need for additional bulky plant rooms or other machinery.

Fire Seal

The Elegance Plus has undergone extensive fire seal testing and fully complies with BS5900:2012 Powered Home Lifts plus has full BS EN 81-41 & AS1735.15 accreditation.

Wide Entry

Wheelchair users will find the wide entry and exit points of the new Elegance Plus particularly useful when manoeuvring their chair in confined spaces.

Level Access

For safety and comfort, the Elegance Plus comes with a gently-angled ramp to enable more convenient entry for wheelchair users and those unable to manage steps.

Typical Lift Installation Applications

Standard

This is our most popular configuration, the Home Lift will travel between a downstairs room such as living room and arrive upstairs, typically in a bedroom.

Stairwell void/landing

Where there is enough room in the turn of a staircase, this positioning option makes use of the dead space in the void making the Home Lift even more unobtrusive.

Cupboard

Thanks to the compact nature of a Compact Home Lift, you can choose to have your lift completely hidden by installing it inside an airing cupboard or wardrobe.

Sloping/vaulted ceilings

Our vertical rails need to fix to a horizontal surface. But don't worry if you have a vaulted ceiling. Our building teams can provide subtle solutions to overcoming pitched roof installations.

Garage

If you are looking to get from your garage safely into your home we can build a simple shaft around your Compact Home Lift to take into account health and safety considerations.

Thru-Car

Unique to Compact Home Lifts is the Thru-Car concept. Enter and exit through opposite sides of the lift car - ideal for wheelchair users or for lifts built into a stairwell void.

FAQs

Is a Compact Home Lift suitable for wheelchair users

Yes. The Compact Elegance Plus Home Lift is ideal for homeowners with mobility issues as it allows them the freedom and independence to move around the home unhindered.

The Elegance Plus is our widest and deepest model and can accommodate a full-sized wheelchair. It is an ideal alternative to a stairlift and perfect if you have limited mobility.

Can I stay in my home for longer with a Compact Home Lift?

Yes. A Compact Home Lift is a great help to those with mobility problems, but it is also purchased by those who are able bodied and looking to future proof their homes. This means you can have the peace of mind to continue to live a full life in the family home you love for many years to come.

What happens if the power fails and I am in my Compact Home Lift?

In the event of a power cut to the home all Compact Home Lifts are equipped with a battery back-up facility. This is included as standard with the lift and will allow anyone in the lift at the time of power failure to gently descend to the lower level of the home, exit the lift, and wait until the power comes back on.

We also offer the option of an uninterrupted power supply. This system can be installed at an extra cost but will allow for numerous trips both up and down while the main power to the lift is out.

Does the Compact Home Lift have a door?

Compact Home Lifts are fitted with a self-closing, hinged door (doors comes in both half height and full height options) that provides a physical barrier during the operation of the lift. The door locks will release when the lift arrives safely at the floor of choice.

What building work will need to be carried out?

Unlike conventional lifts, all that a Compact Home Lift requires for installation is the appropriate aperture to be cut out and trimmed by a qualified builder. The work itself is minimal and not time consuming. There may be instances where small amounts of additional work may need to be carried out such as moving pipes but these will be managed by our building teams and our surveyor will discuss this with you.

How safe is the Compact Home Lift?

The Compact Home Lift has safety sensors fitted above and below the lift car which detect obstructions and smoothly stop the car. The lift is also fitted with a full height light curtain which acts as a sensor and ensures nothing crosses into or out of the lift as it travels. Compact Home Lift engineers are on call 24/7 in the event of a lift emergency.

Is GST applicable on a Compact Home Lift?

GST is chargeable on all Compact Home Lifts but if you are disabled or have a long-term illness you may be exempt from paying GST on products designed or adapted for your own personal or domestic use. If you think you may qualify for GST relief, please request an exemption form from a member of the Compact Home Lift sales team.
